

BRILLA
Public Charter Schools

Brilla Veritas Elementary School
2017-18 ACCOUNTABILITY PLAN
PROGRESS REPORT

Submitted to the SUNY Charter Schools Institute on:

October 16, 2018

By Matt Salvatierra

413 E 144th Street, Bronx NY 10591

347-273-8439

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

Kelsey LaVigne (Superintendent), Michael Carbone (Chief Academic Officer), Matt Salvatierra (Chief Financial and Operating Officer), Zoranly Castillo (Principal) prepared this 2017-18 Accountability Progress Report on behalf of the school's board of trustees:

Trustee's Name	Board Position
Charles Bozian	Treasurer, Finance Committee Member
Brother Brian Carty, FSC	Academic Committee Member
Eric Eckholdt	Chair
Stephanie Saroki de Garcia	Academic Committee Member
Richard Ramirez	Secretary, Academic Committee Member
James Jones	Finance Committee Member
Elena Sada	Academic Committee Member

Kelsey LaVigne has served as the Superintendent since 2017.

Zoranly Castillo has served as the Veritas Elementary School Principal since 2017.

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

Brilla Public Charter Schools are classical schools with a mission to help students grow intellectually, socially and physically into young men and women of good character and spirit, and to be prepared for excellence in high school, college and beyond. The name “Brilla” means “shine” in Spanish, and speaks to the beacon of hope and opportunity we are working to build in the communities we serve.

Brilla Veritas, modeled after the original founding school Brilla College Prep, opened its doors in the fall of 2017 to the first kindergarten class in the neighborhood of Mott Haven in the Bronx’s Community School District 7. At Brilla Veritas, we now serve students in grades K-1 and hope to grow to serve students in grades K-8. Our school population closely mirrors that of our surrounding community: in the 2017-18 school year, our student population was 55% Latino and 43% Black/African American; 96% of our students were economically disadvantaged; 14% received Special Education services and 38% were designated as English Language Learners.

We seek to educate students to lead lives of excellence, virtue and purpose. We do this by leveraging the best instructional practices of model charter schools – a longer school day and year, utilizing technology-based blended learning to deliver individualized instruction, intensively supporting and coaching teachers—and combining this with a robust character education program, centered around our core virtues of courage, justice, wisdom and self-control.

Our approach is rooted in the following cornerstones:

- **High Expectations.** Because we believe in the inherent dignity and potential of every child, we have high expectations for our students’ academic achievement and conduct that make no excuses based on their background or socio-economic status.
- **Lead with Character.** Good character makes for a meaningful life, produces lasting personal and social happiness and contributes to academic success. The development of the virtues of Courage, Justice, Wisdom, and Self-control in students is central to our educational mission.
- **Results Matter.** Brilla relentlessly focuses on high student performance on standardized tests and other objective measures because we hold ourselves accountable for preparing students personally and academically in ways that will enable them to succeed at the best high schools and colleges.
- **Choice & Commitment.** Students, their parents, faculty and staff of Brilla College Prep make a choice to participate in our unique and innovative program. Everyone must make and uphold a commitment to the school and to each other to put in the time and effort required to achieve success.
- **More Time.** There are no shortcuts. Only with an extended school day and year will students have the time to acquire the academic knowledge, skills and habits that will prepare them for success in college and in life.
- **Teach the Best Content.** All Brilla students learn math and science while also becoming familiar with the classics of Western Civilization, because of the way the traditional liberal

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

arts convey truth, beauty, and goodness, and because students need the world’s best content in order to become good citizens and be competitive globally.

In the 2017-2018 school year, Brilla replicated its successful model. In the fall of 2017, Brilla College Prep Elementary expanded into the middle school grades, opening Brilla College Prep Middle School with just 5th graders. At the same time, the education corporation opened Brilla Veritas Elementary School, serving four classes of Kindergarten students.

GOAL 1: ENGLISH LANGUAGE ARTS

Goal 1: English Language Arts

Brilla College Prep students will possess reading and writing skills at or above grade level.

BACKGROUND

Brilla believes that effective, high quality English Language Arts instruction does not solely rely on the assumption and discernment of interconnected skills, but believes that the skills instruction must be embedded within engaging, complex content. At Brilla the utilization of the Common Core State Standards for Language Arts serves as the foundation for our English Language Arts programming which is then thoughtfully combined with the powerful content of the Core Knowledge curriculum (K-4). In order to ensure that students are learning a variety of literacy skills – oracy, language use, literary analysis, nonfiction analysis, foundational skills, and writing – Brilla has aligned the curriculum to ensure consistency and an opportunity for deeper engagement within content. Through this explicit work done over the course of the past year, Brilla has aligned domains of standards and content that allow students authentic interaction and opportunities to represent mastery in multiple ways while also ensuring their preparedness for the state assessments.

Core Knowledge aligns with the classical tradition of the Brilla model – allowing students to interact and learn from both a historical and contemporary perspective grounded in complex texts and topics. Further, this curriculum forms a spiraling foundation of knowledge and literacy skills that is consistently built upon over the course of a Brilla student’s career. This spiraled approach ensures that students enter each new year with the requisite knowledge and skills to immediately interact with more complex tasks and content. Over the course of the 2017-2018 school year, Brilla’s Literacy Lead and Director of Curriculum and Instruction worked with select content planners to

ensure alignment between Reading, Writing, Science & Social Studies and the Arts. This purposeful alignment allows students to engage in content and skill building with depth and focus, while exposing them to a variety of genres about a similar topic. This coherence was further improved with the creation and addition of curricular unit plans – critical documents that allow teachers to unpack the purpose, skills, standards, and criteria for mastery of content – in order to improve their instruction and student outcomes. Along with these unit plans, a unit unpacking protocol was piloted in 2017-2018 to ensure deep understanding and mastery by teachers before implementation with students. During the 2018-2019 school year, this unit unpacking protocol has been embedded into the professional development sequence across campuses for all grades due to its success.

Moreover, one of the strongest programmatic components of the Core Knowledge materials is its holistic, scientifically-grounded Foundational Skills curriculum and materials. During the 2017-2018 school year, this K-2 component of the curriculum was lengthened to allow for better implementation fidelity. In kindergarten, specifically, this deeper approach to a critical component of literacy development paid dividends in end-of-year NWEA results. As Brilla is grounded in the classical tradition, a tradition which is deeply vested in the intense literary abilities across history, the foundation of the K-2 literacy program is exceptionally important. The Core Knowledge Skills curriculum provides students an opportunity to practice and demonstrate mastery of Foundational Common Core Standards while still interacting with comprehensive content.

At Brilla the development of a high-impact literacy program is essential to our model. Brilla's literacy program is comprised of several components – Read Aloud, Writing, Nonfiction Studies (Science and Social Studies), Close Reading, Skills, and Targeted Literacy.

- **Read Aloud:** During Read Aloud, scholars practice active listening, build their understanding of how language works, and appreciate the beauty of an author's craft. Specifically, they build a rich vocabulary and broad knowledge of history and science topics by being exposed to carefully selected, sequenced, and coherent read aloud texts. Read Aloud lessons allow teachers to model fluent reading, anchored in a skills-based objective. Scholars end each lesson with an analysis and discussion of the texts through discourse and reflection.
- **Nonfiction Studies (Science and Social Studies):** During nonfiction studies, students deepen their understanding of the history and science introduced during Read Aloud through experiential learning opportunities, projects, and planned Socratic Dialogue. In some instances students also engage with additional texts, such as nonfiction articles, in order to improve their depth of interaction with literary analysis and content knowledge.
- **Writing:** During the writing block, scholars study how authors of rich mentor texts use voice, organization, ideas, conventions, word choice, and sentence variety to convey meaning. Scholars apply these techniques to craft and publish original writing pieces, including, opinion, informational, and narrative. Teachers group scholars by need and determine individual goals to focus on with each scholar. Goals are determined based on need in the above six traits of writing.

- **Targeted Literacy:** The essential building blocks of reading include both explicit teaching of strategies and authentic opportunities to practice the strategies. As part of Brilla's goal to guarantee 90% of students are reading on grade level by the end of second grade, Brilla worked with the Lavinia Group, a respected early literacy third party to help design a literacy block that includes Guided Reading, Independent Reading, and Literacy Circles differentiated across grade levels. During Targeted Literacy students read independently – practicing the reading behaviors specifically aligned to their needs and practiced with coaching during Guided Reading lessons. Students interact with both pre-selected, high-engagement texts during Guided Reading but build a love of reading by choosing high interest texts on their independent reading level. Libraries consist of classical, content rich, and culturally relevant fiction and non-fiction leveled texts. Students are homogeneously grouped (groups no larger than eight) depending on a triangulation of STEP achievement data, NWEA MAP data and individual conferencing data during Targeted Literacy. This small grouping allows students to grow at faster rates than traditional reading programs. Throughout the year, scholars build reading stamina and work to accomplish individual reading goals, set collaboratively with the teacher based on analysis of achievement data and ongoing progress monitoring. Teachers coach students to achieve their goals during one-on-one conferring sessions anchored in their comprehension, accuracy, or fluency.
- **Close Reading:** During Close Reading, scholars read and analyze a myriad of engaging poems, informational and narrative texts both independently and with the support of their teacher. Scholars develop a deep understanding of genre and use knowledge to make meaning of what the text says explicitly and to make logical inferences grounded in evidence. Teachers facilitate discourse around the central ideas or themes of a text and analyze the author's use of specific craft and structure moves and how they support the main idea.
- **Literacy Skills:** During Literacy Skills, scholars develop the phonics, grammar, and penmanship skills needed to make and convey meaning across all disciplines. Scholars learn through repetition, memorization, and phonetic and grammatical analysis of the English language. Literacy Skills is a part of Brilla's literacy program in grades K-2. By 3rd and 4th grade, the grade majority no longer needs direct instruction in this area, as they are reading to learn, rather than learning to read. Instead, 3rd and 4th graders receive additional intervention and independent reading with conferring to ensure students have the necessary foundational elements for successful reading.
- **Blended Learning:** Scholars receive adaptive, individualized instruction from our suite of computerized blended programs for at least 20 minutes per day. In grades K-4, students participate in iReady, an adaptive and malleable online reading program that aligns to both the Common Core State Standards as well as NWEA skills sequences. In grades 5-8, students engage with Achieve3000, an adaptive program that builds students' literacy skills through in-depth text analysis.

Close Reading was implemented across all grade levels during the 2017-2018 school year. In January 2017, Brilla began working with the Lavinia Group to add Close Reading blocks to enhance its literacy program. Close Reading was implemented across all grade levels during the 2017-2018 school year. During the Close Reading block, scholars are exposed to a variety of genres. Scholars are taught in a

whole-group setting, and learn to annotate texts, think deeply about the main idea, and to respond in writing to rigorous prompts. The whole group setting during close reading is purposeful, as it allows scholars to hear high level responses from their peers. The Targeted Literacy Block is a new innovative approach to strategic reading development for the 2017-2018 school year. Targeted Literacy allows teachers to become experts of specific reading levels and focus on strategies and differentiated techniques to grow students. Students will transition across classrooms depending on their reading level to receive this specialized instruction through Guided Reading small groups, Independent Reading with conferring, and Literacy Circles with facilitated discussion. This block was designed to simultaneously support Brilla's large ELL and SPED population as well as students above grade level expectations in developmentally-appropriate small groups. Over the summer, some of Brilla's master teachers, along with Lavinia Group, created over 300 individual plans to ensure the implementation of this block began with quality. Additionally, more than 200 plans will be added along with approximately 25 days of onsite training provided by Lavinia Group.

Brilla uses a combination of summative and formative assessments to measure efficacy of both the curricula used, and teachers' instructional practices. These assessments include teacher-developed assessment instruments, and standardized assessments, including the Northwest Evaluation Association (NWEA) Measures of Academic Progress (MAP). MAP uses computer-based adaptive assessments to evaluate individual students' proficiency levels. Students' scores are generated immediately, and full performance data with detailed information about specific concepts is available within 24 hours. In order to strengthen Brilla's support of the ELL and SPED population during the 2018-2019 school year and improve the connection to the classical traditions, students will also participate in summative Socratic Seminars and extended authorship opportunities, allowing teachers the opportunity to triangulate and compare qualitative data with the quantitative data produced by many summative assessments. This comparison will be facilitated by newly implemented, school-based Data and Assessment Leads to ensure consistency and fidelity to thoughtful data analysis.

In addition to summative assessments, a variety of formative assessments occur with greater frequency to inform instruction day-to-day. These assessments and means of data collection include:

- Daily questioning during instruction to gauge student thinking and understanding
- Standards-based rubrics to evaluate students during writing assignments or projects
- Computer based assessments from blended learning programs. This data provides snapshots of student achievement that teachers can use weekly to inform instruction, partners for peer work, and groupings
- Reading comprehension / running records to assess scholars' reading skills
- Bi-weekly (K-4) assessments include a variety of question types (multiple choice, open response, etc.) to specifically assess standards mastery covered in the week/unit

The instructional program of Brilla Schools is facilitated by the academic leadership team, which consists of the Superintendent, Chief Academic Officer, School Principal, Assistant Principal and Grade and Content Leads. Professional development is facilitated through an ongoing cycle of clarifying roles and responsibilities, setting clear expectations and goals, coaching and monitoring, and evaluating. This cycle is primarily operationalized through bi-weekly, formal observations followed by one-on-one meetings to set related goals, and action steps to develop teacher practice. Additional professional development is provided through a variety of platforms:

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

- Weekly professional development meetings centered around: data and assessment, school culture, curriculum, instructional practice, etc.
- Collaborative planning and lesson/unit studies in which a group of grade-level teachers meet to unpack and internalize lessons and units before implementation in order to norm criteria for success and high-impact instruction
- External trainings facilitated by industry experts, including a continued partnership with Lavinia Group and University of Chicago Reading and Assessment
- High level walk-throughs and learning walks facilitated by top level leadership, to gauge the overall quality of the instructional program

In the 2017-2018 school year, Brilla particularly focused its professional development on elevating practices around Close Reading and conferring strategies and coaching during small group and independent reading as well as curriculum refinement and backwards planning. Further, literacy training was facilitated by University of Chicago STEP experts around implementation, calibration, and analysis of intermittent reading assessment.

Goal 1: Absolute Measure

Each year, 75 percent of all tested students enrolled in at least their second year will perform at or above proficiency on the New York State English language arts examination for grades 3-8.

METHOD

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

2017-18 State English Language Arts Exam

	Percent	Number Tested	Percent	Number Tested	Percent	Number Tested
--						

Goal 1: Absolute Measure

Each year, the school's aggregate Performance Index ("PI") on the State English language arts exam will meet that year's state Measure of Interim Progress ("MIP") set forth in the state's ESSA accountability system.

METHOD

In New York State, ESSA school performance goals are met by showing that an absolute proportion of a school's students who have taken the English language arts test have scored at the partially proficient, or proficient and advanced performance levels (Levels 2 or 3 & 4). The percentage of students at each of these three levels is used to calculate a PI and determine if the school has met the MIP set each year by the state's ESSA accountability system. To achieve this measure, all tested students must have a PI value that equals or exceeds the state's 2017-18 English language arts MIP for all students. The state plans to calculate and disseminate the MIP in summer 2018. The PI is the sum of the percent of students in all tested grades combined scoring at Level 2, plus two times the percent of students scoring at Level 3, plus two-and-a-half times the percent of students scoring at Level 4. Thus, the highest possible PI is 250.

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

English Language Arts 2017-18 Performance Index

Number in Cohort	Percent of Students at Each Performance Level			
	Level 1	Level 2	Level 3	Level 4
--	--	--	--	--

Goal 1: Comparative Measure

Each year, the percent of all tested students who are enrolled in at least their second year and performing at proficiency on the state English language arts exam will be greater than that of all students in the same tested grades in the school district of comparison.

METHOD

A school compares tested students enrolled in at least their second year to all tested students in the public school district of comparison. Comparisons are between the results for each grade in which the school had tested students in at least their second year at the school and the total result for all students at the corresponding grades in the school district.²

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

² Schools can acquire these data when the New York State Education Department releases its database containing grade level ELA and math test results for all schools and districts statewide. The NYSED announces the release of the data on its [News Release webpage](#).

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

Goal 1: Comparative Measure

Each year, the school will exceed its predicted level of performance on the state English language arts exam by an effect size of 0.3 or above (performing higher than expected to a meaningful degree) according to a regression analysis controlling for economically disadvantaged students among all public schools in New York State.

METHOD

The SUNY Charter Schools Institute (“Institute”) conducts a comparative performance analysis, which compares the school’s performance to that of demographically similar public schools statewide. The Institute uses a regression analysis to control for the percentage of economically disadvantaged students among all public schools in New York State. The Institute compares the school’s actual performance to the predicted performance of public schools with a similar concentration of economically disadvantaged students. The difference between the school’s actual and predicted performance, relative to other schools with similar economically disadvantaged statistics, produces an Effect Size. An Effect Size of 0.3, or performing higher than expected to a meaningful degree, is the requirement for achieving this measure.

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

2016-17 English Language Arts Comparative Performance by Grade Level

Grade	Percent Economically Disadvantaged *	Number Tested	Percent of Students at Levels 3&4		Difference between Actual and Predicted	Effect Size
			Actual	Predicted		
--						--

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

English Language Arts Comparative Performance by School Year

School Year	Grades	Percent Economically Disadvantaged	Number Tested	Actual	Predicted	Effect Size
--						--

Goal 1: Growth Measure³

Each year, under the state’s Growth Model, the school’s mean unadjusted growth percentile in English language arts for all tested students in grades 4-8 will be above the target of 50.

³ See Guidelines for [Creating a SUNY Accountability Plan](#) for an explanation.

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

METHOD

This measure examines the change in performance of the same group of students from one year to the next and the progress they are making in comparison to other students with the same score in the previous year. The analysis only includes students who took the state exam in 2016-17 and also have a state exam score from 2015-16 including students who were retained in the same grade. Students with the same 2015-16 score are ranked by their 2016-17 score and assigned a percentile based on their relative growth in performance (student growth percentile). Students' growth percentiles are aggregated school-wide to yield a school's mean growth percentile. In order for a school to perform above the target for this measure, it must have a mean growth percentile greater than 50.

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

2016-17 English Language Arts Mean Growth Percentile by Grade Level

Grade	Mean Growth Percentile	
	School	Target
4	--	50.0
5		50.0
6		50.0
7		50.0
8		50.0
All		50.0

ADDITIONAL EVIDENCE

As we do not have past performance data on this metric, we are unable to provide comparative analysis.

English Language Arts Mean Growth Percentile by Grade Level and School Year

Grade	Mean Growth Percentile			
	2014-15	2015-16	2016-17	Target
4	--	--	--	50.0
5				50.0
6				50.0
7				50.0
8				50.0
All	--	--	--	50.0

Goal 4: Optional Measure

Brilla College Prep students will outperform the local school district by 10 percentage points, as measured by the percentage at Levels 3 and 4 in the same grades on the state Math exam.

METHOD:

A school compares tested students enrolled in at least their second year to all tested students in the public school district of comparison. Comparisons are between the results for each grade in which the school had tested students in at least their second year at the school and the total result for all students at the corresponding grades in the school district.

SUMMARY OF THE ENGLISH LANGUAGE ARTS GOAL

Type	Measure	Outcome
Absolute	Each year, 75 percent of all tested students who are enrolled in at least their second year will perform at proficiency on the New York State English language arts exam for grades 3-8.	Unable to Report at this Time
Absolute	Each year, the school's aggregate PI on the state's English language arts exam will meet that year's state MIP as set forth in the state's ESSA accountability system.	Unable to Report at this Time
Comparative	Each year, the percent of all tested students who are enrolled in at least their second year and performing at proficiency on the state English language arts exam will be greater than that of students in the same tested grades in the school district of comparison.	Unable to Report at this Time
Comparative	Each year, the school will exceed its predicted level of performance on the state English language arts exam by an effect size of 0.3 or above (performing higher than expected to a small degree) according to a regression analysis controlling for economically disadvantaged students among all public schools in New York State. (Using 2016-17 results.)	Unable to Report at this Time
Growth	Each year, under the state's Growth Model the school's mean unadjusted growth percentile in English language arts for all tested students in grades 4-8 will be above the target of 50. (Using 2016-17 results.)	Unable to Report at this Time
Optional	Veritas students will outperform the local school district by 10 percentage points, as measured by the percentage at Levels 3 and 4 in the same grades on the state ELA exam.	Unable to Report at this Time

ACTION PLAN

In summer of 2017 we expanded the implementation of Close Reading across all grades, working with the Lavinia Group, founded by Success Academy alumnus and THINK Literacy creator, Arin Lavina. Lavinia has worked with the most successful charter schools in New York City. We anticipate that deepening this implementation of "close reading" will continue to grow our achievement within our ELA program. Additionally, we have expanded this partnership in the summer of 2018 to innovate around a differentiated, encompassing approach to literacy development in our younger grades (K-2) through Targeted Literacy. This block, conceived by our Chief Academic Officer and Lavinia Group, seeks to ensure sustained growth and achievement in literacy development to prepare students for the rigor of our third and fourth grade curriculum. This program does not replace our Core Knowledge curriculum, but enhances and complements it

through the inclusion of reading best practices and small group instruction utilizing a variety of junior classic texts.

During Brilla Veritas's first year, we expanded our staff capacity to focus on continued improvement of our ELA program by using the close geographic proximity of the Veritas campus and the flagship Brilla College Prep campus through cross-campus curriculum planning. Given the success and improvement witnessed in both quality of curriculum and quality of implementation, a Literacy GCL position has been hired in order to ensure the alignment between grade-level standards and curricular scope and sequence, lead the analysis of school-wide literacy and writing data to coach best practices in planning and instruction, and develop the deep content knowledge of all the teachers in the literacy domains by overseeing the expansion of daily and weekly lesson plans, extended performance tasks, and identification and analysis of aligned classical texts. Additionally, this year, the network Director of Student Services (full-time) will help capacitate the principal and new Veritas Student Services Coordinator. Additionally, the principal of Veritas has also agreed to pilot the position of English Language Learning Specialist (part-time). This extra lift is possible through the building of the Veritas leadership team which now includes a principal, an assistant principal and two Grade & Content Leads. The Director of Students Services will provide leadership capacity to our growing Student Services staff and focus on the alignment and execution of academic interventions for students identified as requiring services and students transitioning in our intervention cycle. The Student Services Team will begin creating differentiated materials to supplement our Tier 1 literacy program that ensure inclusion and acquisition of knowledge and skills is both related to the core literacy content as well as ensure these students make gains. Additionally, Brilla has identified programmatic weaknesses in the development of vocabulary for our English Language Learners through multiple data sources. Given the large population of ELLs the school serves, we are piloting an ELL Specialist in a part-time capacity to work with and improve the holistic approach to complex vocabulary acquisition in our literacy programming. Further, last year the instructional leadership team piloted a Learning Walk Protocol, modeled after Instructional Rounds, to develop a deeper approach to the collection and analysis of instructional moves based on differentiated data points, add coherence and structure to the professional development of school and grade level leaders, and provide ongoing content and instruction support around promising practices to all Brilla schools. These Learning Walks will be fully implemented in the 2018-2019 school year to ensure fidelity and quality in implementation of the literacy program.

Brilla will also continue to leverage professional development to strengthen instruction in literacy. In order for students to have access to high-quality instruction that will lead to significant academic progress, teachers need to deeply understand the curriculum and content. It is critical that teachers have an understanding of the Common Core State Standards and are able to access resources that help break down the standards. Teachers need to be able to identify the difference between a core foundational standard for the grade from those standards that are simply 'supporting' or 'additional' standards. With this knowledge, teachers can then prioritize which standards to go deep on and which can be cut from curriculum or not need that much focus (specifically if pacing is a challenge due to scholars being behind academically). A depth of content knowledge also better prepares teachers to anticipate misconceptions, understand student pathways of learning, and allows teachers to better shift the cognitive load to students. While growth was made in this area last school year, in 2018-2019 the focus will be to also deepen teachers' understanding of the Classical Tradition and pedagogical elements included within it – including speaking and listening,

crafting authentic, extended writing tasks, and interaction with historic, classically beautiful writing and art forms.

Through professional development, systems and procedures, teachers and Brilla staff will develop a deep understanding of their curriculum and content. One way we aim to achieve this is through unit studies prior to the launch of a new unit. Approximately two weeks before the beginning of a new unit, teachers will analyze the upcoming unit by looking at the standards addressed, identify a rigorous and engaging essential question, complete the end of unit assessment to understand what student mastery looks like, and break down the key content and knowledge goals of the unit. On a daily basis, teachers will complete lesson internalization guides, which aim to accomplish similar objectives as the unit study, on a more micro level. These lesson internalization guides will prompt teachers to think about the standards, objective, task/activity, and end of lesson assessment (exit ticket), ensuring that all four components are aligned. These guides will also prompt teachers to identify the most crucial questions that will promote student mastery to ask during the lesson, with scripted, exemplar responses. Through coaching and feedback from the grade and content lead, these unit maps and lesson internalization guides are one way Brilla intends to promote and develop content knowledge. Further, 2018-2019 will involve “Looking at Student Work” protocols that allow teachers to, on an interim basis, check for the quality of student work during the unit to determine corrections and increasing opportunities for mastery demonstration and complexity in literacy.

GOAL 2: MATHEMATICS

Goal 2: Mathematics

Brilla College Prep students will possess mathematics skills at or above grade level.

BACKGROUND

As with ELA, New York State has adopted the Common Core State Standards. Brilla believes the Common Core Mathematics Standards build upon each other in a logical way that develops students' conceptual understanding of math. As such, the curriculum Brilla has chosen to use aligns to these standards.

Specifically, Brilla (K-8) uses Eureka Math, a Singapore-style curriculum from Great Minds (formerly EngageNY). Brilla has implemented a coherent mathematics program beginning in kindergarten by using Eureka math. The curriculum emphasizes incremental learning and extensive practice; major concepts are broken down into discrete components, put together over time, and then continuously reviewed and expanded upon. Students are exposed to abstract concepts, in a manner that breaks each down and makes them accessible. Each concept starts with a concrete, tangible representation, and then progresses to a pictorial representation, and finally moves to an abstract, numerical representation. In having scholars begin with concrete representations, teachers are able to develop deep, conceptual understanding in all students. In addition, Brilla's math program emphasizes speaking and writing with mathematical language, which is an essential part of the Common Core Standards. In 2017-2018 kindergarten teams at Brilla Veritas and Brilla College Prep Elementary piloted an innovative, inquiry-based mathematics program called Math Stories – developed by the Achievement First Network. This program focuses on the Operations and Algebraic Thinking strands of the Common Core Standards and combines elements of literacy and unique, discussion-based problem-solving to our approach to math.

In 2018-2019, due to the success of the Math Stories implementation and improvement in the Operations and Algebraic Thinking domain, both elementary schools will be utilizing the training and program for all students K-4. This decision was made mid-year when Brilla noticed the lagging of this foundational strand and because it aligns with our classical approach – a discussion-based opportunity for students to make meaning together.

Eureka Math is a curriculum published by Great Minds, a nonprofit organization that seeks to ensure that all students receive a content-rich education, underscoring our commitment to classical education and teaching the best content. The material upon which Eureka Math is based was originally created through a partnership with the New York State Education Department and differs from other programs in that, rather than being an update to existing material, it was designed specifically for the common core. In a 2015 Consumer Reports style

review for instructional materials by the nonprofit EdReports.org, Eureka Math was the only curriculum series found to be aligned to the Common Core State Standards at all grade levels reviewed and far surpassed all other curricula evaluated. Eureka Math presents mathematics in a logical progression from PK through Grade 12. This coherent approach allows teachers to know what incoming students already have learned and ensures that students are prepared for what comes next. By using Eureka Math, Brilla hopes to reduce gaps in student learning, instill persistence in problem solving, and prepare students to understand advanced math. Eureka Math goes beyond simply teaching students to know the process for solving a problem. Eureka Math maintains that students need to understand why that process works so they will have the ability to generalize their learning and apply it to problems across settings. Teaching mathematics as a story, Eureka Math builds students' knowledge logically and thoroughly to help them achieve deep understanding.

Blended learning is also a key component to mathematics instruction at Brilla. Scholars receive adaptive, individualized instruction from our suite of computerized blended learning time for at least 20 minutes per day. Students at Brilla use iReady Math and Zearn (K-4). Both programs are adaptive and assignable programs that ensure each student receives targeted instruction.

For math assessment, Brilla use a combination of summative and formative, standardized and teacher-developed assessment instruments, including the Northwest Evaluation Association (NWEA) Measures of Academic Progress (MAP). At the end of each quarter/trimester, all students take an Interim Assessment (IA) to evaluate them against the standards taught throughout the quarter/trimester. This data is used to inform future instruction, including the identification of students for remediation or enrichment services, and to measure any instructional discrepancies. Additionally, students take a Math Stories assessment three times per year, specifically focused on problem-solving capability.

In addition to summative assessments, a variety of formative assessments occur with greater frequency to inform instruction day-to-day. These assessments and means of data collection include:

- Daily questioning during instruction to gauge student thinking and understanding
- Computer based assessments from blended learning programs. This data provides snapshots of student achievement that teachers can use weekly to inform instruction, partners for peer work, and groupings
- Bi-weekly assessments (K-4) to assess mastery of the standards taught the previous two weeks
- Daily exit tickets that will be reviewed and analyzed

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

As with literacy, the mathematics instructional program of Brilla Schools is facilitated by the academic leadership team, which consists of the Superintendent, Chief Academic Officer, School Principals, Assistant Principals and Grade and Content Leads. Additionally, given the importance of improving our mathematics programming, Brilla Veritas has assigned the Assistant Principal as the Math Specialist for the campus to ensure consistency and alignment across grades as well as support the Math Stories teacher. Professional development is facilitated through an ongoing cycle of clarifying roles and responsibilities, setting clear expectations and goals, coaching and monitoring, and evaluating. This cycle is primarily operationalized through bi-weekly, formal observations followed by one-on-one meetings to set related goals, and action steps to develop teacher practice. Additional professional development is provided through a variety of platforms:

- Weekly professional development meetings centered around: data and assessment, school culture, curriculum, instructional practice, etc.
- Professional Learning Communities through which a diverse mix of teachers collaborate around teaching and learning practice (e.g. content teams, grade teams, student study teams, school-wide initiative teams).
- External trainings facilitated by industry experts including Achievement First Math Stories and the National Council for Teachers of Mathematics
- High level walk-throughs and learning walks facilitated by top level leadership

In the 2017-2018 school year, Brilla particularly focused its mathematics professional development in kindergarten math stories implementation and on improving its instructional response to mathematics.

Goal 2: Absolute Measure

Each year, 75 percent of all tested students enrolled in at least their second year will perform at proficiency on the New York State mathematics examination for grades 3-8.

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

METHOD

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

2017-18 State Mathematics Exam
Number of Students Tested and Not Tested

Grade	Total Tested	Not Tested ⁴				Total Enrolled
		IEP	ELL	Absent	Refused	
--						--

⁴ Students exempted from this exam according to their Individualized Education Program (IEP), because of English Language Learners (ELL) status, or absence for at least some part of the exam.

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

Performance on 2017-18 State Mathematics Exam By All Students and Students Enrolled in At Least Their Second Year

Grades	All Students		Enrolled in at least their Second Year	
	Percent Proficient	Number Tested	Percent Proficient	Number Tested
--	--	--	--	--

	Percent	Number Tested	Percent	Number Tested	Percent	Number Tested
--	--	--	--	--	--	--

Goal 2: Absolute Measure

Each year, the school's aggregate Performance Index ("PI") on the state mathematics exam will meet that year's state Measure of Interim Progress ("MIP") set forth in the state's ESSA accountability system.

METHOD

In New York State, ESSA school performance goals are met by showing that an absolute proportion of a school's students who have taken the mathematics test have scored at the partially proficient, or proficient and advanced performance levels (Levels 2 or 3 & 4). The percentage of students at each of these three levels is used to calculate a PI and determine if the school has met the MIP set each year by the state's ESSA accountability system. To achieve this measure, all tested students must have a PI value that equals or exceeds the state's 2017-18 mathematics MIP for all students. The state plans to calculate and disseminate the MIP in summer 2018. The PI is the sum of the percent of students in all tested grades combined scoring at Level 2, plus two times the percent of students scoring at Level 3, plus two-and-a-half times the percent of students scoring at Level 4. Thus, the highest possible PI is 250.

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

Mathematics 2017-18 Performance Level Index (PI)				
Number in Cohort	Percent of Students at Each Performance Level			
	Level 1	Level 2	Level 3	Level 4
--	--	--	--	--

Goal 2: Comparative Measure

Each year, the percent of all tested students who are enrolled in at least their second year and performing at proficiency on the state mathematics exam will be greater than that of all students in the same tested grades in the school district of comparison.

METHOD

A school compares the performance of tested students enrolled in at least their second year to that of all tested students in the public school district of comparison. Comparisons are between the results for each grade in which the school had tested students in at least their second year at the school and the total result for all students at the corresponding grades in the school district.⁵

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

Grade	Percent of Students at or Above Proficiency			
	Charter School Students In At Least 2 nd Year		All District Students	
	Percent	Number Tested	Percent	Number Tested
--	--	--	--	--

⁵ Schools can acquire these data when the New York State Education Department releases its database containing grade level ELA and math test results for all schools and districts statewide. The NYSED announces the release of the data on its [News Release webpage](#).

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

ADDITIONAL EVIDENCE

As we do not have past performance data on this metric, we are unable to provide comparative analysis.

Mathematics Performance of Charter School and Local District by Grade Level and School Year

Grade	Percent of Students Enrolled in at Least their Second Year Who Are at Proficiency Compared to Local District Students					
	2015-16		2016-17		2017-18	
	Charter School	District	Charter School	District	Charter School	District
--	--	--	--	--	--	--

Goal 2: Comparative Measure

Each year, the school will exceed its predicted level of performance on the state mathematics exam by an Effect Size of 0.3 or above (performing higher than expected to a meaningful degree) according to a regression analysis controlling for economically disadvantaged students among all public schools in New York State.

METHOD

The Institute conducts a Comparative Performance Analysis, which compares the school's performance to that of demographically similar public schools statewide. The Institute uses a regression analysis to control for the percentage of economically disadvantaged students among all public schools in New York State. The Institute compares the school's actual performance to the predicted performance of public schools with a similar concentration of economically disadvantaged students. The difference between the school's actual and predicted performance, relative to other schools with similar economically disadvantaged statistics, produces an Effect Size. An Effect Size of 0.3, or performing higher than expected to a meaningful degree, is the requirement for achieving this measure.

RESULTS AND EVALUATION

As we do not have past performance data on this metric, we are unable to provide comparative analysis.

2016-17 Mathematics Comparative Performance by Grade Level

Grade	Percent Economically Disadvantaged *	Number Tested	Percent of Students at Levels 3&4		Difference between Actual and Predicted	Effect Size
			Actual	Predicted

Mathematics Comparative Performance by School Year

School Year	Grades	Percent Economically Disadvantaged	Number Tested	Actual	Predicted	Effect Size
--	--	--	--	--	--	--

Goal 2: Growth Measure⁶

Each year, under the state's Growth Model, the school's mean unadjusted growth percentile in mathematics for all tested students in grades 4-8 will be above the target of 50.

METHOD

This measure examines the change in performance of the same group of students from one year to the next and the progress they are making in comparison to other students with the same score in the previous year. The analysis only includes students who took the state exam in 2016-17 and also have a state exam score in 2015-16 including students who were retained in the same grade. Students with the same 2015-16 scores are ranked by their 2016-17 scores and assigned a percentile based on their relative growth in performance (student growth percentile). Students' growth percentiles are aggregated school-wide to yield a school's mean growth percentile. In order for a school to meet the measure, the school would have to achieve a mean growth percentile above the target of 50.

RESULTS AND EVALUATION

As we do not have past performance data on this metric, we are unable to provide comparative analysis.

2016-17 Mathematics Mean Growth Percentile by Grade Level

Grade	Mean Growth Percentile	
	School	Target
4	--	50.0
5	--	50.0
6	--	50.0

⁶ See Guidelines for [Creating a SUNY Accountability Plan](#) for an explanation.

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

7	--	50.0
8	--	50.0
All	--	50.0

ADDITIONAL EVIDENCE

As we do not have past performance data on this metric, we are unable to provide comparative analysis.

Mathematics Mean Growth Percentile by Grade Level and School Year

Grade	Mean Growth Percentile			Target
	2014-15	2015-16	2016-17	
4	--	--	--	50.0
5	--	--	--	50.0
6	--	--	--	50.0
7	--	--	--	50.0
8	--	--	--	50.0
All	--	--	--	50.0

Goal 4: Optional Measure

Brilla College Prep students will outperform the local school district by 10 percentage points, as measured by the percentage at Levels 3 and 4 in the same grades on the state Math exam.

METHOD:

A school compares tested students enrolled in at least their second year to all tested students in the public school district of comparison. Comparisons are between the results for each grade in which the school had tested students in at least their second year at the school and the total result for all students at the corresponding grades in the school district.

As we do not have past performance data on this metric, we are unable to provide comparative analysis.

SUMMARY OF THE MATHEMATICS GOAL

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

Type	Measure	Outcome
Absolute	Each year, 75 percent of all tested students who are enrolled in at least their second year will perform at proficiency on the New York State mathematics exam for grades 3-8.	Unable to Report at this Time

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

Absolute	Each year, the school's aggregate PI on the state's English language arts exam will meet that year's state MIP as set forth in the state's ESSA accountability system.	Unable to Report at this Time
Comparative	Each year, the percent of all tested students who are enrolled in at least their second year and performing at proficiency on the state mathematics exam will be greater than that of students in the same tested grades in the school district of comparison.	Unable to Report at this Time
Comparative	Each year, the school will exceed its predicted level of performance on the state mathematics exam by an Effect Size of 0.3 or above (performing higher than expected to a small degree) according to a regression analysis controlling for economically disadvantaged students among all public schools in New York State. (Using 2016-17 results.)	Unable to Report at this Time
Growth	Each year, under the state's Growth Model the school's mean unadjusted growth percentile in mathematics for all tested students in grades 4-8 will be above the target of 50. (Using the 2016-17 results.)	Unable to Report at this Time
Optional	Veritas students will outperform the local school district by 10 percentage points, as measured by the percentage at Levels 3 and 4 in the same grades on the state Math exam	Unable to Report at this Time

ACTION PLAN

Brilla has made a commitment to strengthening its mathematics program in the 2018-2019 school year. Each elementary school will fully implement the Math Stories, inquiry-based learning block in addition to our Eureka Curriculum in order to ensure consistent exposure and mastery opportunities of foundational operations and thinking skills. Additionally with the addition of iReady Math to our blended learning program suite as well as a designated school-wide expert for math content implementation and training, we are confident our program will experience gains this coming school year. Additionally, our character-based initiatives programming will include elements of mathematics in our regular morning meeting and advisory classes to ensure students are getting at-bats with grade-level standards.

The addition of a Director of Student Services will also provide expertise and guidance to teachers to effectively impact our students receiving services.

GOAL 3: SCIENCE

Goal 3: Science

Brilla College Prep students will possess science skills at or above grade level.

BACKGROUND

At the elementary level (K-4), science curriculum is aligned to the Core Knowledge Sequence that drives ELA instruction. This alignment allows for scholars to delve into thematic units and to experience connections across contents. The Science curriculum has a commitment to engage scholars through inquiry and experiential, hands-on learning. This approach encourages scholars to think critically about the world around them by exposing them to lessons that force them to analyze and assess real world and historical content. Science lessons, while primarily project-based, include:

- Experiments: in these lessons, scholars follow the Inquiry Cycle to explore different problems and work to formulate conclusions and/or possible solutions. Scholars have the opportunity to conduct experiments as a whole class, in small groups, and individually.
- Hands-on: Scholars engage in lessons where the purpose is to learn through experience. They will create projects that challenge and engage their thinking to work, over time, toward a final project, while simultaneously utilizing math and literacy skills. To create these projects, scholars work on their process skills to take a project from start to finish. They work both independently and collaboratively on projects to also build up their communication and socialization skills.
- Didactic (teacher-led instruction): Scholars engage in didactic lessons where they are first taught information by an instructor or instructive material. They then continue the lesson by practicing or applying the concepts taught individually, with a partner, or in a small group.
- Socratic Seminars: During socratic seminar lessons, students engage in thoughtful, critical-thinking based discussions that reinforce habits of discussion learned in other content areas. The teacher/student asks a question and then “steps back” from the discussion and allows for the students to drive the conversation.

Many science units culminate in a summative assessment that measures scholar mastery of the content from the unit. For some units, an experiential task, graded on a rubric score that is defined prior to the start to the unit and aligned to standards, serves as the ultimate measure of content and standard mastery. Teachers also utilize writing pieces or multiple-choice assessments to measure scholar learning.

The Core Knowledge Sequence spirals each year through topics in biology, chemistry, physics and earth science. Our students have been working with this curriculum since the beginning of kindergarten. Throughout elementary years, students are given a breadth of knowledge about the different fields of

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

science. The Core Knowledge Sequence is aligned with the science concepts outlined in the NYS standards for science and prepare students to deepen understanding in high school when they're exposed to higher-level concepts in biology, chemistry and physics. The Core Knowledge sequence also aligns with Brilla's focus on writing and literacy skills – ensuring students are exposed to a variety of nonfiction sources.

Brilla is cognizant of the need to ensure wide coverage of New York state science standards and works to supplement units that align to the New York State Science Standards, so scholars can be adequately prepared for the 4th and 8th grade Science Exams. The New York State Science Standards clearly outline the different knowledge students need to be successful in understanding the variety of science fields.

This curriculum emphasizes the following techniques to teaching science:

- Do: first-hand investigations are crucial in developing scientific understanding.
- Talk: student-to-student discourse and full class discussions are an integral part of the program.
- Read: students read age-appropriate books or scientific articles, focusing their reading activities on searching for evidence related to their hands-on investigation.
- Write: following real-world practices, students write scientific arguments based on evidence they've collected.

Additionally, experiments are graded on a rubric assessing demonstration of science knowledge as well as group work. Just as in math and ELA, other daily formative assessment tools, such as questioning and exit tickets, are also employed.

As with literacy and mathematics, professional development is led by the school's academic leadership team.

Goal 3: Absolute Measure

Each year, 75 percent of all tested students enrolled in at least their second year will perform at or above proficiency on the New York State science examination.

METHOD

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

Charter School Performance on 2017-18 State Science Exam By All Students and Students Enrolled in At Least Their Second Year

Grade	Percent of Students at Proficiency	
	Charter School Students In At Least 2 nd Year	All District Students

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

	Percent Proficient	Number Tested	Percent Proficient	Number Tested

SUMMARY OF THE SCIENCE GOAL

Type	Measure	Outcome
Absolute	Each year, 75 percent of all tested students enrolled in at least their second year will perform at or above proficiency on the New York State examination.	Unable to Calculate
Comparative	Each year, the percent of all tested students enrolled in at least their second year and performing at proficiency on the state exam will be greater than that of all students in the same tested grades in the school district of comparison.	Unable to Calculate

ACTION PLAN

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

GOAL 4: ESSA

Goal 4: ESSA

Brilla will remain in good standing according to the state's ESSA accountability system.

Goal 4: Absolute Measure

Under the state's ESSA accountability system, the school is in good standing: the state has not identified the school for comprehensive or targeted improvement.

METHOD

Because *all* students are expected to meet the state's performance standards, the federal statute stipulates that various sub-populations and demographic categories of students among all tested students must meet the state standard in and of themselves aside from the overall school results. As New York State, like all states, is required to establish a specific system for making these determinations for its public schools, charter schools do not have latitude in establishing their own performance levels or criteria of success for meeting the ESSA accountability requirements. Each

2017-18 ACCOUNTABILITY PLAN PROGRESS REPORT

year, the state issues School Report Cards that indicate a school's status under the state accountability system.

RESULTS AND EVALUATION

As Brilla Veritas currently serves students in grades K-1, this data cannot be provided at this time.

ADDITIONAL EVIDENCE

Accountability Status by Year

Year	Status
2017-2018	--

APPENDIX A: OPTIONAL GOALS

The following section contains a Parent Satisfaction optional goal, as well as examples of possible optional measures.

Goal 5: NWEA MAP PERCENTILE RANKING

Brilla will demonstrate sufficient progress on the NWEA MAP assessment.

Goal 5: Comparative Measure

At the end of each year the average percentile ranking will be at least 50% in reading and math.

METHOD

Each year, Brilla students, in all grades take the NWEA Measures of Academic Progress (MAP) Assessment. This nationally recognized, and nationally-normed, assessment allows Brilla to compare its progress to other schools and students across the country.

RESULTS

Based on the 2017-2018 results, students’ average percentile ranking was above the 50th percentile, with the average percentile of students being 69 in literacy and 74 in math, exceeding the goal by 19 points and 24 points, respectively.

EVALUATION

Brilla meaningfully exceeded this optional goal. In 2017-2018, Brilla made a strategic decision to enhance the utilization of data, specifically NWEA data and bi-weekly assessments to differentiate instruction to ensure that all students continued growth. An increase in average percentile, especially above the 50th percentile, is an aggregate indicator of successfully advancing student achievement.

Goal 5: Growth Measure

At the end of each year 60% of students will have achieved their growth target in reading and math based on mean growth in the latest norming study for students who had a starting RIT score in the same 10 point RIT block.

METHOD

Each year, Brilla students, in all grades take the NWEA Measures of Academic Progress (MAP) Assessment. This nationally recognized, and nationally-normed, assessment allows Brilla to compare its progress to other schools and students across the country.

RESULTS

Brilla Veritas meaningfully surpassed expectations, with 97% of students passing their NWEA growth target in Reading and 100% of students passing their NWEA growth target in Math.

EVALUATION

Brilla exceeded this optional goal. NWEA states that the common expectation is for only 50% of students to meet their end-of-year growth targets. At Brilla, we set aggressive growth targets for students below the 60th percentile using a specific algorithm that accounts for instructional time

and the components of our model. These goals ensure students are outpacing their NWEA recommended goals. Given the ending percentile and number of students meeting and/or exceeding their NWEA growth targets substantially verifies the sustainability and success of the model.
